

It takes humans to protect humanity.

Make changes to end climate change.

Design a better future.

M/PACT[™]
CARBON NEUTRAL PROGRAM

Milliken[™]

CLIMATE CHANGE IS ONE OF THE GREATEST THREATS FACING HUMANITY, AND WE ARE ALL RESPONSIBLE.

That's why Milliken Floor Covering launched the **M/PACT™** carbon neutral program. Today, our carpet, LVT and entrance flooring tiles are carbon neutral everywhere in the world.

M/PACT carbon neutral products offset the raw materials and manufacturing carbon footprint* by using 3rd party Verified Carbon Standard Credits that support renewable energy and carbon reduction technologies to help fight climate change. When you choose M/PACT products, you can be sure your choice is carbon neutral.

OUR CARBON NEUTRAL PROGRAM
M/PACT™

M/PACT™ CARBON NEUTRAL PROGRAM

Reduce Waste

Our Modular Landscapes solution can save up to 25% of the cost of broadloom over the life of the product. It reduces waste, offers superior durability, and the tiles are easy to install or replace.

Materials

We believe material health is essential to enable circularity. The use of materials that don't contain harmful chemicals provides a critical pathway to end-of-life product recycling. That's why all of our carpet is Red List Free, and our carpet, resilient flooring and entryway tiles are recyclable.

Wellness

Climate change directly impacts human health and wellness. We believe carbon neutral products are one important way that designers can create healthy interiors to benefit those inside their buildings and human health as a whole. We also make the quietest floors in the industry. In fact, our acoustic technology can reduce indoor noise up to 50% compared to standard flooring products, which aids in restful, sound sleep.

Diversity and Inclusion

We set 2025 People Goals that align with the United Nations SDGs including gender equality and reduced inequalities.

We will continue to do more to lower our carbon footprint.

The M/PACT™ program is long-term, because the fight to stop climate change will be a long one. As a global manufacturing company, we set 2025 goals that align with the United Nations Sustainable Development Goals, including a 25% reduction in indexed green-house emissions by 2025. We encourage you to specify carbon neutral products for all of your projects.

Together, we can make a positive **M/PACT™** on the world for generations.

* As calculated and verified scope A1-3 GWP through a ISO14025/ISO14040 compliant LCA and published in third party EPDs.
