

# TractionBack® Plus

## ADHESIVE-FREE

**For Carpet :** Milliken WellBAC™ cushion backing with TractionBack® high-friction coating + connectors

NO LIMIT

NO LIMIT  
New Construction

NO LIMIT  
Renovations

DRY TIME  
not applicable

WORKING TIME  
indefinite

TractionBack® +  
Connectors

## TractionBack® Plus

For use with RH up to **No RH Limit**

NO pH or RH LIMITS.  
NO TESTING REQUIRED.  
NO VAPOR RETARDER REQUIRED

Installation after new pour: **30 days**

The Benefits of  
Milliken Adhesives

Milliken offers adhesive solutions for any scenario:

- Modular carpet, LVT, mixed-media
- Normal RH and pH
- Extreme RH and no-testing solutions
- Trowel-on, Spray & Adhesive-free options for most applications
- No primers, no sealants, limited floor prep required

### FLOORING TYPE

**Modular carpet tile** with TractionBack® high-friction coating + connectors.

**ESTIMATED COVERAGE**  
Connector application rate varies based on installation method and tile size. For details reference chart to the right.

### CONNECTOR APPLICATION RATE:

The chart below shows the coverage rate based on 1 box of 500 connectors

TILE SIZE	INSTALLATION METHOD		
	Monolithic/ Quarter-Turn / Multidirectional	Horizontal (Brick) Ashlar / Vertical Ashlar	Herringbone
50cm square	130 sq-yds	65 sq-yds	n/a
1m square	525 sq-yds	275 sq-yds	n/a
25cm x 1m plank	130 sq-yds	65 sq-yds	65 sq-yds
50cm x 1m plank	270 sq-yds	135 sq-yds	135 sq-yds

# TractionBack® Plus

Standard Milliken cushion backing with TractionBack® high-friction coating + connectors

## PRIMARY BENEFITS

**TractionBack® Plus keeps carpet in place, without supplemental adhesives, floor sealers, or primers— and there are NO RH or pH limits**

**TractionBack® Plus combines a proprietary high-friction backing technology (TractionBack®) with the addition of connectors (applied separately). With the added connectors there is no longer a need for adhesives at the perimeter — in fact, TractionBack® Plus requires NO liquid or spray adhesives of any kind.**

- NO moisture testing — NO RH or pH limits
- Priming and sealing is reduced or eliminated
- Time savings — no waiting for adhesives to dry
- TractionBack® Plus eliminates the VoCs associated with sealants and adhesives
- Tiles can be lifted and replaced multiple times with no loss of traction effect

## A note about our connectors

TractionBack® Plus connectors are centered under each corner of the tile, regardless of tile size or installation method.

## Installation benefits of Milliken cushion backing

**TractionBack® Plus provides the same advantages that come with any Milliken cushion-backed modular product:**

- Non-reactive backing greatly reduces floor prep time, and eliminates adhesive failures from plasticizer migration
- Unlike some products with thin thermoplastic backings, the thickness of our cushion will result in virtually no telegraphing
- Industry-best moisture management: TractionBack® Plus has NO RH or pH limits — NO moisture testing is required for ANY install, on-grade or above-grade

## CONSIDERATIONS FOR THE REAL-WORLD

### TractionBack® and TractionBack® Plus go hand in hand.

The two systems are identical aside from the addition of connectors with TractionBack® Plus. This is significant, because it is possible to start with TractionBack® and upgrade to TractionBack® Plus should unexpected moisture concerns arise during installation.

Or, perhaps TractionBack® was specified, but later in the process the use of perimeter adhesives becomes an issue, or it's determined that heavier rolling traffic will be part of the mix. In any of these cases, product already delivered can be used, with only the addition of TractionBack® Plus connectors.
